

## Cool Control 1.0 l

## Milk chilled to 4 °C for optimum deliciousness

Coffee creations with milk and milk foam are hugely popular. For perfect results, they need milk that is chilled to 4 °C. The Cool Control with its dishwasher-safe stainless steel milk container is really easy to fill and keeps the milk at the ideal temperature all day, ensuring freshness, hygiene and perfect results every time.

### Perfection in form and function

Its exterior bears all the hallmarks of JURA's distinctive design, with high-quality materials and precision craftsmanship. At the same time, it offers unparalleled functionality. The cover of 1.5 mm thick brushed stainless steel with an integrated locking mechanism guarantees that the milk is stored safely. With its clean, minimalist lines, the Cool Control 1.01 is the perfect accessory for any JURA coffee machine.

### The perfect addition to your JURA coffee machine

The wireless\* communication between the Cool Control and the automatic coffee machine and the integrated level indicator ensure that the user is always reminded when the cooler needs to be topped up with milk.

\*By using the Wireless Transmitter (available as an option) the Cool Control is compatible with all JURA automatic speciality coffee machines that are equipped with Smart Connect.

When used with the WiFi Connect (available as an option) the Cool Control is compatible with all JURA automatic speciality coffee machines that are equipped with WiFi Connect.

### Ideal use of space

The slim and elegant design of the Cool Control allows it to be used in locations where space is limited. Due to its slim shape, the milk cooler can easily be fitted into small kitchens and break rooms. This means that speciality coffees with milk and light, frothy milk foam can be added to the menu – whether at home or in the office.

### Maximum convenience

The Cool Control is easy to operate and offers maximum convenience. Milk can be added quickly and easily without needing to remove the milk container. The digital temperature display and precisely fitting cover ensure easy handling. The integrated Peltier cooling element ensures that the milk is kept at a temperature of 4 °C, providing the optimum conditions for perfect speciality coffees with milk and milk foam. The stainless steel milk container, metal tube and adapter are also dishwasher-safe for easy cleaning.
